

## CHRYSANTHEMUM PLANT NAMED 'CHARUMBLA'

### Abstract of the Disclosure

A new and distinct Chrysanthemum cultivar is provided that is a whole plant mutation of the 'Chamanda' cultivar (United States Plant Patent Application No. 10/114,954, filed April 4, 2002). The natural flowering time is mid-October. Attractive blossoms are formed in clusters that display white ray florets and yellow disc florets. The growth habit of the plant is rather dense, stocky, and semi-erect. Decorative medium green foliage is formed. The plant displays good culture regularity and grows well in pots.
